

EE 522 - PsiQuantum Group - Weekly Report 1

Kush Aggarwal
Thomas Huang
Christopher Sharp

Previous Meeting Items

This is our first meeting of the quarter.

Future Plan

After discussing with Mariia, we are working on getting set up with Workbench, PsiQuantum's Python library for quantum programming, and familiarizing ourselves with basics of writing and testing code in it through a series of tutorial notebooks provided to us. We will also be working on developing a more specific project plan.

The idea is to work on implementing algorithms in Workbench. We will be reviewing possible algorithms in [this paper](#) and checking them against already-implemented algorithms, then dividing up possible new algorithms between us to work on in parallel.

We are also setting up a GitHub repo ahead of next week's meeting with Mariia.

Problems

So far, so good.
